# ProtoGenx

# Active Zinc

Active Zinc is a liquid dietary supplement that provides zinc in the sulfate heptahydrate form for ease of absorption. Zinc is the second most abundant trace mineral in the human body. You will find zinc in every bodily tissue and tissue fluid. Zinc has many biomechanical functions. Many forms of zinc require optimal digestion to be absorbed and are absorbed through the bowels. Active Zinc is ideal for optimal digestion.

**Suggested Use:** As a dietary supplement, adults take 1 to 2 teaspoons per day mixed with water or juice or as directed by your healthcare provider. Shake well; contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

\*These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

# CNT- Liqueissance

The connective tissue is a vast network of cells which offer various functions that support cell integrity, vascular framework, and muscular/cell tensegrity. To support healthy cellular nutrition, repair, and aid cell interactions, the formula CNT includes, but is not limited to, Boswellia, Camu Camu, and Marigold extracts. It is valuable for supporting the connective tissue and keeping those cells nurtured.

CNT is the “home run” joint and connective tissue product.

Suggested Use: Adults take 1 to 2 teaspoons per day or as directed by your healthcare provider. Shake well contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

† These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

# Daily DTOX ECD

Burdock, Stinging Nettle, and Chickweed help this formula truly optimize cellular DTOXification. This formula is mutually supportive and stimulating for the liver using Dandelion and Cat's Claw. ECD means Extra Cellular Drainage outside the cells. For all DTOXification processes, be sure that the client is drinking adequately the recommended amount of filtered water or natural mineral water. Daily DTOX supports the natural function of cell cleansing at an extracellular level.

Suggested Use: Adults take 1 teaspoon 2 times per day, or as directed by your healthcare provider. Shake well, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Daily DTOX ICD

**Product Description:** The onslaught of daily toxicity is particularly of concern especially when clients are not eating properly. The 'on-the-go' diets, or pre-packaged, and restaurant meals are notoriously low on the essential fatty acids, mineral balance, and they contain high amounts of both sugar and salt (sodium chloride). Daily DTOX supports the natural function of cell cleansing at an intracellular level. DTOXification is more than just herbs. One of the better ways also is to support a OMAD (one meal a day) format of limiting a food intake window to 8 or 6 hours) so that the body doesn't have to spend time digesting. Drinking adequate levels of appropriate water is vital. The ICD side means Intercellular Drainage within the cell walls.

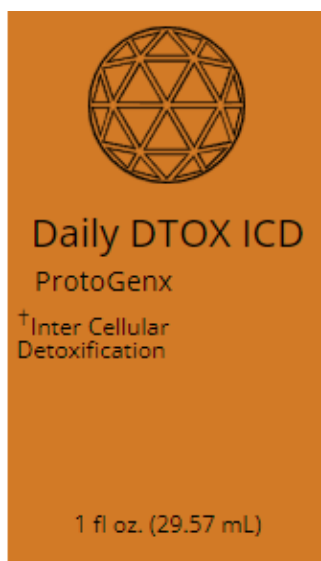

**Suggested Use:** Adults take 3-5 sprays 3 times a day, or as directed by your healthcare provider. Shake well, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

† These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

# Digestion Support

Digestion Support is effective either before or after a meal. Oregon Grape, Milk Thistle, and Ginger Root are added to Cinnamon Bark and horehound leaves to support the digestive process. Carminatives taken after a meal have been used for over a century to encourage the stomach's production of digestive juices. Although it has been a practice to add these after a meal, the most productive time is a teaspoon just after the first few minutes of beginning eating with some hot tea.

Suggested Use: Adults take 1 to 2 teaspoons per day. Shake Well. Contents may settle.  
Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

\* These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

# Dura Care

There are times when the inner tissues of the body need support. They can effectively dry out. This is a reason to use Dura Care. The ligaments, the mucosal linings, the soft tissues and even the fascia need to stay fluid-bathed to maintain their moisture. Joint capsules and tendons also love the addition of the Dura Care herbs. Made from bark extracts, there are many synergistic ingredients that coat inner tissues and linings that are drying out due to the tissue expression—White Pine, Inner bark of Kudzu, and Juniper Berries aid the tissue linings. Juniper Berries extraction provides the essential oil coating necessary to retain moisture and reduce expression. Juniper Berry, Thuja, has been found helpful for post-conflict repair. The reason Lee named it Dura Care is because it supports Durability for membranes. Aging!

Suggested Use: Adults take 1 tsp. 2 times per day or as directed by your healthcare provider. Shake well; contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

## Supplement Facts\*

Serving Size: 1 teaspoon(s)

Amount Per Serving	% Daily Value
Potassium 3.32mg	<1%
Proprietary Extract Blend 0.48mL	†
Honduran Sarsaparilla Root, Poke Root, Kudzu Root, Japanese Knotweed Root, Juniper Berry, Wild Cherry Bark, Birch Bark, Hyssop Herb Aerial, White Pine Bark, Prickly Ash Bark, Pau D'Arco Inner Bark, Jatoba Bark, Slippery Elm Bark.	

Other Ingredients: Water, Organic Sugar Cane Ethanol (0-7% v/v), Citric Acid, Potassium Sorbate.

**Ingredients:** Extracts from: Honduran Sarsaparilla Root, Poke Root, Mealy Kudzu (Fen-Ke) Root, Japanese Knotweed Root, Juniper Berry, Wild Cherry Bark, Birch Bark, Hyssop Herb Aerial, White Pine Bark, Prickly Ash Bark, Pau D'Arco Inner Bark, Jatoba Bark, Slippery Elm Bark, Water, Organic Sugar Cane Ethanol, Citric Acid, Potassium Sorbate

# EndroCare

Add EndroCare to the mix to provide healthy hormone support and utilization. EndroCare supports cellular actions so that hormones are functionally utilized. During stress, hormones get broken down to be used as a metabolic DTOXification step, when they were designed otherwise as messengers. Key support for the endocrine system includes Wild Cherry bark, Sarsaparilla, and Japanese Knotweed and Poke Root.

**Suggested Use:** Adults take 1 teaspoon twice per day, or as directed by your healthcare provider. Take between meals without food. Store in a cool place. Gently shake, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Gen Vitality

It's time to get things up to speed with Gen Vitality! The herb Long Jack is well known as testosterone sparing—providing the best life for testosterone in the body. With Pine Bark and Long Jack and the synergistic blend of the other herbs such as Kudzu Bark and Mucuna, they all support the New Zealand Deer Antler Velvet which harmonizes the hormone transport chain.

Suggested Use: Adults take 1 to 2 teaspoons per day or as directed by your healthcare provider. Gently shake, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Genophasic 1

Genophasic 1 is a synergistic recovery/support-based herb complex blended with Nobel Minerals and cellular resources for Phase 1 plus cellular apoptosis. When cells die, they send minerals and light to the new cell and transfer their energy to the new cell. The old cell dies and must be dismantled or DTOXified. This is an ongoing cellular process, day and night. This is Apoptosis.

**Suggested Use:** As a dietary supplement, adults take 7 to 10 drops three times a day, under the tongue. Gently shake, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Genophasic Matrix

Genophasic Matrix works at cellular substrate levels to enhance enzyme function. Pre-Cellular metabolism is accomplished through enzyme functions utilizing herbs and minerals in specific concentrations which provides a perfect way to support the cells. Genophasic Matrix is ideal if cells need a jump-start in enhancing enzyme function. Shitake mushrooms and Oyster mushrooms are key in cellular balance added to fulvic acids and MSM. Clients will want to include enzyme rich foods and add digestive enzymes to increase complete metabolism synthesis at all levels. Methylation is all intercellular so can be used to support B vitamin uptake or conversion. It CAN be combined with ANY OTHER GENOPHASIC.

**Suggested Use:** Adults take 7 to 10 drops three times a day, under the tongue or as directed by your healthcare provider. Gently shake, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

† These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

# Heart Kidney Support

The need for the heart's 100,000 beats or the kidneys' 180 gallons of filtering blood daily is vital in moving waste and distributing nutrients to the tissues. The kidneys and heart are critical to all body systems, and they need support to optimize and run at their very best. With Hawthorne berry and arjuna bark, HKS provides support for both systems. Then, by adding the synergy of Solomon's Seal, you've got a crowning formula.

Suggested Use: Adults take 1 teaspoon in the morning with breakfast and 1 teaspoon in the evening before bed. Women who are pregnant should consult your Primary Healthcare Provider before use. Shake well, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Hi-D

We offer the Hi-D product that is suitable even for vegans. Some vitamin D products have been on the market for years, but these have typically been synthetic or made from ingredients we would not choose to put in our products, such as sheep's wool/lanolin. We source the Agaricus bisporus mushrooms. Like most mushrooms, Agaricus bisporus mushrooms are considered a functional food with a broad range of benefits. They are rich in bioactive compounds, including amino acids, fatty acids, beta-glucan, and various antioxidants. This combination makes them useful for maintaining cellular health, immunity, and metabolism along with the benefits of naturally occurring vitamin D. Researchers have found that mushrooms respond to light in the same way humans do, by converting the sun's rays into Vitamin D. Mushrooms have a natural level of Vitamin D. When exposed to sunlight, they synthesize Vitamin D even more. These mushrooms also contain chemicals called chitin and lovastatin, which have cholesterol-lowering effects. Hi-D along with Grass-fed butter supports the Keratin layer of tissue protection.

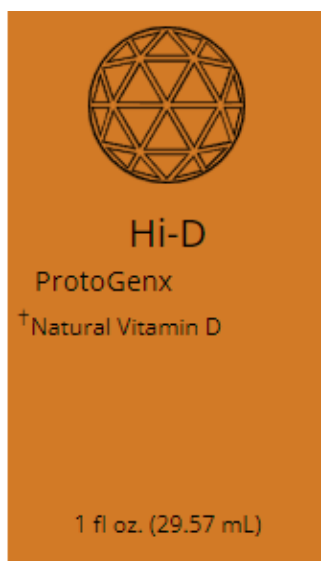

**Suggested Use:** Adults take 7 to 10 drops per day or as directed by your healthcare provider. Shake well, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# HydreX

Restoring cellular hydration isn't as easy as it sounds. Many people drink water, and they still show dehydration—the tissues don't absorb the water. HydreX is designed to help cells hold water! Do the pinch-your- skin test. If you can pinch 1/2 inch of skin on the back of your hand and it takes more than one second to get back to normal, that is the beginning signs of dehydration. Also look at the pads of your fingertips— are there any squiggly lines? If it's on the ring finger or little finger's pads, those show significant dehydration. Avoid tap water due to fluoride. When folks say that they hate the taste of water, then for sure they are heading to levels of concern that need to be addressed. Adding lemons to their water may help. Avoid sparkling waters. HydreX is one of those have-on-hand products that is good for taking camping, hiking, walking, and even shopping. Dehydration isn't good for the kidneys or the brain—let alone all the other trillion cells in the body. Someone said that about 70 percent of the human body is made up of water. How can that be if we are dehydrated? We use an organic food grade natural glycerin to help hold the moisture, HydreX can be added to any wellness appointments. Travel to higher altitudes should include HydreX and Terrain Factors.

**Suggested Use:** Adults take 7 to 10 drops 3 times a day, under the tongue or as directed by your healthcare provider. Take between meals. Drink a lot of pure water. Gently shake, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

Vegetable Glycerin, Methylsulfonylmethane (MSM).	

Other Ingredients: Water, Organic Ethanol (0% v/v), Silica, Pink Himalayan Salt, Citric Acid, Potassium Sorbate.

**Ingredients:** Extracts from: Vegetable Glycerin, Methylsulfonylmethane (MSM), Water, Organic Ethanol, Silica, Pink Himalayan Salt, Citric Acid, Potassium Sorbate

# Immune Support

This product can be sprayed often and can support the soft epithelial layer tissues. Some of the key herbs include Kudzu (Fen Ke) Root, Baikal Skullcap Root, Eucalyptus Leaf, Andrographis Leaf, Astragalus Root, Balloon Flower Root, and Chaga Mushroom. Chaga Mushroom on birch trees are known to offer very strong immune support and is very rare.

**Suggested Use:** Adults take 7 to 10 drops three times a day, under the tongue or as directed by your healthcare provider. Gently shake, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

† These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

# Iodine Infusion

Because Iodine is utilized by every cell in the body, it is not uncommon to have a deficiency. There is mounting evidence that iodine deficiency is becoming an alarming statistic in mineral deficiency testing (hair). The fact that iodine is a highly valent mineral, it's important to know that it also gets pushed around by chlorine, fluorine, and bromine which are stronger and can displace iodine in the thyroid gland. Also, after an Xray or exposure to radiation (EMF) or air travel (ultraviolet microwave etc.) the iodine gets used up and leads to cellular exhaustion. Iodine has been shown to become a wellness preventative—meaning that it supports so many tissues that when it is depleted, many body systems can suffer. Don't forget iodine has been shown to protect upper lymph tissues (breast) and build spleen/immunity just as its natural function. Light in a bottle. The reason it's so healing is that it has 53 electrons and is full of energy!

**Suggested Use:** Adults take 4 sprays 3 times a day or as directed by your healthcare provider. Shake well, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Kidney DTOX

Consider helping the kidneys flush the excess with Kidney DTOX. Kidney DTOX has a profound ingredient list that will be amazing in providing support for ongoing kidney functioning at optimal levels. It has several quality extracted blends of herbs in the formula such as Spanish needle, Matico, and Bugle Weed. The formula also centers around Chanca Piedra, commonly known as the stone breaker in herbology. Because the diaphragm is important in keeping the lower body circulation returning fluids back to the central vascular system, be sure that there is adequate circulation in feet and lower legs, by regular movement, and deep breathing. Also make sure that the socks aren't too tight that encircle the ankles. Avoid a high sodium chloride diet. Thousands of capillary miles push return fluids out from the connective tissue back up into the lymphatic system in the connective tissue. Walking is vital for keeping the lower body in rhythm with the upper body circulation. They say that 'sitting is the new smoking,' and sitting for long hours could become part of the issue for lower body fluid retention.

Suggested Use: Adults take 1 tsp. 2 times per day or as directed by your healthcare provider. Shake well; contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Lung Care

Oxygenation is vital. When the lungs need some extra help, use Lung Care for lung tissue support. Vitality of the lungs also supports the large intestines. Consider Lung Care to support the lung's capacity to function more fully and eliminate acids at the cellular level. Red Oak bark and Mansa Leaf are mainstays in supporting the lungs, but they are supported by many other critical herbs such as Wild Cherry Bark and Red Reishi Mushroom extract.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

**Ingredients:** Extracts from: Oak Bark (Red), Wild Cherry Bark, Yerba Mansa Root, Spanish Needle Leaf, Lobelia Leaf, Stoneroot, Red Reishi Mushroom, Ginger Root, Turmeric Root, Red Bell Pepper Fruit, Water, Organic Sugar Cane Ethanol, Stevia Extract Powder, Citric Acid, Potassium Sorbate

# Lymph Care

Whole body lymphatic system support for overall body tissues. Added with the immune building efforts of the thymus, Lymph Care is great for extra cellular drainage support. Marshmallow Root, Poke Root, New Jersey Tea, and Mexican Sarsaparilla are supported by Speedwell, Thuja, and Thyme leaves. Other supporting herbs are uniquely blended into the formulation so that a deep cleaning action activates and stimulates lymphatic flow, yet stimulates the immune functions of the lymph nodes.

**Suggested Use:** As a dietary supplement, adults take 7 to 10 drops 3 times a day under the tongue, or as directed by your healthcare provider. Shake well, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Lymph Complete

Sometimes the lymphatic system becomes sluggish and doesn't flow properly. Various parts of the body can accumulate fluids around the joints and underneath the arms. Combined with exercise and an adequate water intake, supports the lymphatic as it 'cleans' out debris. Lymphatic drainage is important. Good for both upper and lower lymphatic drainage this complex can be considered a 'whole body' lymphatic support with Figwort, Andrographis, and Barberry Root to lead the way. Clients will like this formula. Be sure to move the body and get adequate hydration.

**Suggested Use:** As a dietary supplement, adults take 7 to 10 drops three times a day, under the tongue or as directed by your healthcare provider. Shake gently, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Melatonin

During the day, the pineal gland is mostly inactive, but once the sun goes down it gets turned on and begins to release melatonin into your bloodstream. Because the body makes its own melatonin, it should be a natural fact that we all have enough; however, the busy lifestyle of too much blue screen at night, late night TV, and prolonged lack of sleep during stressful times, keeps the body from producing the proper amount. With toxicity of the brain also on the rise, the pineal is supposed to signal the production of melatonin, but it needs to be all made in the dark at night. When we have low level lights or a TV on in the room, and it's not pitch black, then melatonin production is lowered. Melatonin is a hormone, and it is responsible for DTOXification of the brain as well as promoting sleep. Recognize that just starting out, many times taking this product can cause sleeplessness to occur (as it DTOXifies the brain first) then aids in sleep. If needed, add Natural Sleep.

**Suggested Use:** Adults take 7-10 drops just before sleep or as directed by your healthcare provider. Gently shake, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# MHB 23

A proper diet is important in maintaining cell energy and MHB aids in that support. MHB also aids metabolic function so that the body can optimize energy production at the cellular level. The main formulation is based on a unique formula: a complex set of herbs derived from an ancient formulation providing cellular substrate support with vital cell nutrition. Moringa, Aloe vera, Barberry, and Jiaogulan are foundational to restoration of vital cell energy. For the best success, begin a DTOXification process and avoid GMO and toxic foods.

Suggested Use: Mix 1 teaspoon full into 8 fl. oz. of water or juice. Shake vigorously and drink or as directed by your healthcare provider. Shake Well. Contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# MMC

Eight traditional medicinal and body system supporting mushrooms considered as master mushroom extracts are combined within this synergistic blend. Extracts from Enoki Mushroom, Cordyceps Mushroom, Chaga Mushroom, Turkey Tail Mushroom, Shitake Mushroom Fruitbody, Lion's Mane Mushroom, Red Reishi Mushroom, and Agaricus Mushroom are combined to support the whole body—brain, body, and immune. Mushrooms have many qualities of their own and when combined with, they can be used to support metabolic processes and cellular functions. Consider this as a whole body 'cellular matrix' support product.

**Suggested Use:** As a dietary supplement, adults take 7 to 10 drops three times a day, under the tongue. Gently shake, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Natural Mag

When natural mag is used, the body can utilize functional magnesium (magnesium in its natural state) along with all the inherent other minerals all in balance. Clients who use Natural Mag find they have less body aches and more relaxed muscles as a result, and they don't suffer from the 'loose stool' scenario other magnesium products create. Many of the culinary herbs such as Spirulina, Basil Leaf, Celery Root, Fennel Seed, Japanese Chlorella, and Stinging Nettle are all magnesium-rich herbs, and they combine into a great tasting formula.

Suggested Use: Adults take 1 tsp. 2 times per day or as directed by your healthcare provider. Shake well; contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Natural Sleep

Because sleep is so vital for tissue repair at night, getting to sleep and keeping from it being fitful is important—especially when a person is overly tired. They say, ‘tired but wired.’ Turn off the computer and TV early in the evening. Prepare for the nighttime routine by 9 p.m. Take a soak, or listen to calming music. But when your client needs more support, consider the Natural Sleep Herbal blend for sustained sleep at night. This herbal complex is designed to synergistically support mental relaxation, taking advantage of American Skullcap, Catnip Leaf, Hops Flowers, and Chamomile Flower. If needed, you can add extra Valerian as a body de-stressor. **DO NOT TAKE AND THEN OPERATE MACHINERY.**

**Suggested Use:** As a dietary supplement. Adults take 7 - 10 drops just before sleep or as directed by your healthcare provider.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Nerve Support

The nervous system is bioelectrical in nature and for it to be fully effective, the two phases of the autonomic nervous system, which is dialectic; sympathetic (action/go) is paired with the para-sympathetic (rest/digest). The two can't operate simultaneously, so one side must give into the other side. When our lives get so involved that we eat on the run, don't get 'ready for bed' to really get true rest, then we are keeping the sympathetic system 'on.' The need to support the Nervous System switching is vital because the nerves must respond to our inner lives as well as our physical stress. The two-phase process is important for healing. The rest and digest also include sleep and peaceful thinking. This is why meditation has been found to be useful. Nerve support using synergistic herbs includes extracts from: Passionflower, Icelandic Moss, Jujube Fruit, Magnolia Bark, American Skullcap, White Pine Bark, Muira Puama, Wood Betony, and Black Cohosh Root.

**Suggested Use:** 7-10 drops, 3 times a day or during stressful periods. Gently shake, contents may settle

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Opure Care

Opure Care supports deep tissue cleansing. Used as a bridge between Genos and Lymph, this formula is very profound. The reader may not be aware of this, but all organs have an 'excess toxins drain' function which is termed the 'organ sinus.' This drain is used to DTOX the organ at the deeper mesenchyme layer. (Inside the organ, Parenchyma is the outer layer.) OpureCare supports direct organ drainage and deep extracellular cleansing. The formulation is unique because it includes: extracts of Garlic Root, Chickweed, Stone Root, Barberry Root, and Heal All to name a few. It also is endowed with two Nobel minerals: Gold and Silver.

Suggested Use: Adults take 1 to 2 teaspoons per day, or as directed by your healthcare provider. Take between meals, without food. Store in a cool place. Shake well, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Seven Seas

Made to support the thyroid and mineralization in general, Seven Seas is a sea-based mineral complex. Seven Seas is comprised of seven sea-based vegetables; most are sourced from pristine waters of Nova Scotia and the Nordic seas. We feel that the power of the sea is filled in this bottle based on synergistic and full spectrum methods of these unique seven seaweed extractions. This formula contains heavy hitters like Sea Buckthorn, Icelandic Moss, Nori, and Dulse to name a few. We've also added artichoke leaf for enhanced mineralization and the added benefit of astaxanthin as a sea-based antioxidant.

Suggested Use: Adults take 1 to 2 teaspoons per day or as directed by your healthcare provider. Shake well, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Terrain Factors Cinnamon

This formulation is one of the most unique of its kind. Use this product to support intracellular and extracellular pH balancing, hydration, and cellular mineral recovery. Terrain Factor Cinnamon and/or Citrus is mixed with a base of important natural minerals that are entirely colloidal (bioavailability). There are many misconceptions today regarding proper pH balance. Many believe that the pH balance is managed mostly by foods. However, many factors, including diet, stress, and popular drinks, can alter your body's pH and reduce cellular hydration. Extracellular is the fluid outside of the cell that collectively equates to around 40 percent of the body's water. In comparison, intracellular is the fluid inside the cell, representing up to 30 percent of the body's total weight. Many Americans are dehydrated, plus they are increasingly becoming more acidotic. Five percent or more do not even drink water. With a powerhouse formulation, it is great for post-gym workouts. Proper cellular hydration is important for many body functions, all cell activities to balance pH, and combat daytime fatigue. This product has been a mainstay at NH for over twenty years. It includes wonderful ingredients that support connective tissue, muscles, and extracellular pH by using Dulce, Arjuna, Bladderwrack, Irish Moss, Chaga Mushroom, Humic Minerals plus (Calcium lime) and Fulvic Acid.

Suggested Use: Adults take 1 tsp. 2 times per day or as directed by your healthcare provider. Gently shake, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# ThyroCare

**Product Descriptions:** The thyroid, as you know, has been given the role of metabolism. We all know that it is more than just that, but when the metabolism or body temperature is consistently low (cold hands and feet), thyroid support is important to help the body's overall metabolism rise. Although not completely responsible for weight gain/loss, the thyroid has been implicated in the speed of metabolic processes. This is a gently warming formula and clients will notice that effect in the taste. Extracts from: Ashwagandha Root, Bladderwrack (Seaweed), Kelp Seaweed, Jujube Fruit, Schisandra (Wu Wei Zi) Berry, N-Acetyl L-Tyrosine, Cayenne Fruit also feed the thyroid tissues naturally. The cayenne makes a slight warming effect when swallowed.

**Suggested Use:** Adults take 1 tsp, 2 times per day or as directed by your healthcare provider. Shake well, contents may settle. This formula contains cayenne fruit and a slight warming sensation is normal, dilute in water to minimize this effect.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# TNG (Teeth and Gums)

The soft tissues of the mouth need extra support at times. The breakdown of gum tissue or teeth cause tooth decay. Take this formula for healthy oral support. Additional help comes from blood-root, which has a valuable role in supporting healthy restoration of tissues and teeth. Includes several herbs: Plantain Leaf, Marigold Flower, Cryptolepis Root, Poke Root, Birch Bark, Bloodroot, Astragalus Root, White Willow Bark, and Red Clover.

**Suggested Use:** Shake Well. Spray 4 pumps into mouth. Saturate entire gum area for 30 seconds and then swallow. Do not take food or liquid for at least 15 minutes before and after treatment. This product is not a dentifrice and should not be used as a substitute for regular brushing.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

† These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

**Ingredients:** Extracts from: Common Plantain Leaf, Marigold Flower, Cryptolepis Root, Poke Root, Bloodroot, Birch Bark, Astragalus Root, White Willow Bark, Red Clover Flower, Water, Organic Sugar Cane Ethanol, Citric Acid, Potassium Sorbate

# Total B

Total B is made with whole foods and naturally cultured nutritional yeast providing the complete B complex within the formula. Cultured B vitamins are ultra-absorbable. Total B is a bridge-type product which includes true cellular nutrition of the B vitamins which are in their natural form coming from whole foods such as asparagus, parsley extracts and nutritional yeast. The formula speaks for itself with a unique approach for supporting the complete B vitamin complex, in a cultured form. Significant amounts of the B vitamins should come from grass-fed beef, eggs, mackerel, and salmon, etc. But due to challenges that everyone faces, supporting B vitamin uptake is a vital step in supporting the daily stress, nervous system, and brain functions. In summary: Total B fills an especially important transition role and targets cellular absorption and metabolism. It provides cellular nutrition for B vitamin absorption. To do this and to offer DTOXification at that same time takes this unique blend. It is a great formula for transitioning from Vit B depletion to full B utilization and ongoing B support.

Suggested Use: Adults take 1 to 2 teaspoons per day, or as directed by your healthcare provider. Shake well, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Tranquil Care

When there is an outstanding issue, the support of Tranquil Care may provide that extra help needed to get through the day's stress. This formula includes Silk tree flower, Echinacea, Chaste Tree Berry, Oat Straw, Passionflower, and Hops. It is not addictive and provides what the brain needs for functional mental rest. Best when taken in the evenings, don't operate machinery while on this product. Not for children.

**Suggested Use:** Adults take 3-5 sprays 3 times a day or as directed by your healthcare provider. Shake well, contents may settle.

**Warning:** As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Ultra GL

The liver has a direct impact on many metabolic functions. There are many metabolic processes that the liver accomplishes along with making up to 1.5 liters of bile per day, but as a chemical/metabolic processing plant, the liver is a perfect chemical factory that DTOXifies and supports the creation of many enzymes important for the digestion of food. Two phases of DTOXification are processed by oxidation and conjugation. Ultra GL is a great support for those processes. Bile acids are formed in the liver cells, which affect digestion, especially fats. The liver also stores B vitamins and creates glycogen and cholesterol. Healthy fats don't generate cholesterol or what is called cholesterol damage. The body needs cholesterol to make hormones and provide healing. Healthy cholesterol levels are supported by cream, butter, and eggs. Usually, people do an annual liver cleanse, but constant liver support is vital instead. Ultra GL, as a tonic, will dramatically support the body's liver functions with a complex herbal blend. Some of the herbs include Beet Root, Celery Stalk (Fresh), Blackberry Fruit, Chaga Mushroom, Burdock, Japanese Chlorella, Quinine Bark, Milk Thistle, Schisandra Berry, Boldo Leaf, Cinnamon Bark, Astragalus Root, Chinese Rhubarb (Da Huang) Root, Fo-Ti (He Shou Wu) Root, Turmeric Root, Chicory Root, Artichoke Leaf, and Chanca Piedra (takes stones out of the liver).

Suggested Use: Adults take 1 tsp, 2 times per day or as directed by your healthcare provider. Shake well, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

† These statements have not been evaluated by the Food & Drug Administration. This product is not designed to diagnose, cure, treat, or prevent any disease.

# VitaCare

When the body feels achy, tired, and run down, there are some vital nutritional herbs that can help. VitaCare has those herbs, and it is based on Cinchona Bark which is a great tissue alkalizer. VitaCare supports the nasal tissues, the sinus, and the lungs. If there is a 'scratchy' feeling, use VitaCare. Also uses additional extracts from: Chaga Mushroom, Moringa Leaf, European Elderberry Fruit, Yellow Dock Root, Honduran Sarsaparilla Root, Star Anise, Juniper Berry, Shiitake Mushroom Fruit Body, Angelica Root, Rosemary Leaf and Hops Flower.

Suggested Use: Adults take 7 to 10 drops three times a day under the tongue or as directed by your healthcare provider. Gently shake, contents may settle.

Warning: As with any supplement, if you have any questions regarding this product, or are pregnant or nursing, consult your healthcare provider.

# Wholesome C

Wholesome C is made with wholefood sources, and herbs that are the highest in vitamin C and bioflavonoids. Whole food vitamin C provides a combination of nutrients, bioactive compounds, and fiber that work synergistically to support overall health compared to Vitamin C synthetic counterparts! Our top extract in this formula is Camu Camu berries because they are one of the richest natural sources of vitamin C. Wholesome C is a powerful antioxidant that helps protect the body against free radicals, supports the immune system by enhancing the production and function of white blood cells, promotes collagen synthesis for healthy skin, and aids in the absorption of iron (red blood cell production and oxygen transport). Vitamin C is involved in the production of neurotransmitters like serotonin, which promote a happy mood, sleep, and appetite. Overall, Wholesome C can be used for our overall well-being. If we have adequate vitamin C intake, it can help to downgrade and reduce the duration and severity of cold symptoms. Consuming natural vitamin C from Camu Camu can contribute to reducing oxidative stress and protecting cells from damage. Vitamin C is necessary for the synthesis of collagen, a protein that provides structural support to the skin, bones, tendons, and blood vessels. Adequate vitamin C intake can promote skin health, improve wound healing, and support joint flexibility. Some research suggests that vitamin C may play a role in mood regulation. It is involved in the production of neurotransmitters like serotonin, which is linked to mood, sleep, and appetite. Adequate vitamin C levels may contribute to improved mood and overall well-being. Vitamin C enhances the absorption of iron from plant-based sources, such as beans, lentils, and spinach. Iron is crucial for the production of red blood cells and the transportation of oxygen throughout the body. Combining natural vitamin C with iron-rich foods can optimize iron absorption.

**Suggested Use:** Adults take 1 to 2 teaspoons per day or as directed by your healthcare provider. Shake well, contents may settle.
